ONE TOOL FOR A LIFE LIVED OUTDOORS

For generations, the knife has been the most reliable tool one can carry...and it's a tool that Buck Knives has been making with pride for over a century. You need a tool you can always count on, when and where you need it most. One that doesn't rely on battery life—but is fueled by passion for a life lived outdoors. Tried and true, and always by your side.

FOREVER MEANS FOREVER

At Buck, we guarantee our knives forever because we believe in the integrity of our products.

It was the philosophy of our founder, Hoyt Buck, who pioneered our Forever Warranty and we continue to pass it down with each generation. Complete warranty information is on our website at www.buckknives.com.

THE STEEL

Buck is a market leader in edge retention thanks to our steel selections and heat treat process pioneered by Paul Bos, whose heat treating system has proven to be the best in the business.

Each blade is put through a rigorous heat treat process and quality performance test, then is tempered to the appropriate Rockwell Hardness through a heating, freezing, and reheating system. This process, along with attention to detail through grinding and hand edging, are the foundation of our Edge2X™ technology. This gives you longer edge life, ease of resharpening and a blade that will not fail you.

This premium-powdered steel has the same edge retention as S30V but with properties that allow it to resharpen easier. This would be appropriate for the adventure hunter who will be miles away from camp and intends to skin multiple animals and resharpen in the field.

Rc 59-61

Small grain structure with a high carbon content has allowed this powdered steel to become the industry standard by which other super steels are compared with. With our BOS heat treat process, the Rc 59-61 steel outperforms other steels in edge retention, ductility, and wear resistance. This steel takes a beating and holds an edge for a long time. The properties that allow it to hold an edge also slow the sharpening process. S30V is perfect for somebody who does not want to have to sharpen in the field because it will not be needed. If your goal is to field dress and skin an elk, or get through tough daily chores without having to resharpen, S30V is your best choice.

Rc 59-61

The addition of Molybdenum to a standard 440C recipe allows this stainless steel to have properties that show an increased level of toughness (ductility) and wear resistance. The carbon content of 154CM is a jump over 420HC which results in giving up a little corrosion resistance to get durability and better edge retention. This steel is best suited for knives that will see hard use as a tool.

Rc 59-61

This martensitic stainless steel with its hardness at an Rc of 58-60 results in a good balance between edge retention, amazing corrosion resistance, and ease of resharpening. This steel is a good choice for every kind of knife from hunting and everyday carry, to kitchen cutlery. This high value steel will live through years of service and edge maintenance.

Rc 58-60

This high carbon spring steel is a good choice for applications that require impact loads and extreme bending. Our Compadre Froe and Axe are good examples of this type of tool. At Rc 57-58 the steel is not brittle. It will bend and flex back to original shape while still remaining hard enough for good edge retentions. To remedy this, all of our 5160 blades are coated to prevent rust.

Rc 57-58

PRODUCT LEVELS

Assigning our knives to levels is helpful in guiding your customers to the right kind of knife for their needs.

We recognize consumers are tightening budgets, so we break down our products into choices by price point and materials. It's as simple as "good-better-best," with great value at every level.

Pro: Taking a century's worth of knife craftsmanship to an unprecedented level, our Pro Level knives are designed and crafted to be used in the most demanding situations. Premium materials and revolutionary designs are combined with the highest quality American craftsmanship. The result is a superior knife that discerning users can rely on in any situation. Designed and handcrafted in the USA.

Avid: Dependability is at the heart of everything that is Buck. Our loyalists expect no-nonsense practicality and our Avid Level knives define this characteristic. Designed for functionality and crafted from high quality materials, these knives deliver consistent reliability under rigorous use. Designed and handcrafted in the USA.

Select: Our Select Level offers reliable products at an unsurpassed value. Quality materials and innovative Buck designs create practical knives and tools that deliver affordable excellence. Designed in the USA. Built in the USA or imported.

BUCK KNIVES AND TAYLOR GUITARS

partner to upgrade handles with genuine ebony

Buck Knives, leader in sports cutlery, is dedicated to providing high performance products of uncompromising quality while preserving resources for future generations.

Buck Knives is excited to partner with Taylor Guitars, one of the world's leading manufacturers of premium acoustic guitars, and take part in their efforts using a sustainable supply model for genuine ebony handles on our key heritage products, the 110 Folding Hunter®, the 112 Ranger®, and the 101 Hunter.

Ebony wood was originally introduced on the 110 and 112 models in the 1960's, but in the 1990's, federal regulations on endangered woods led Buck to utilize a resin treated wood. Harvested under Taylor's thriving conservation project, Buck will again employ the use of ebony, a natural material with beautiful grain patterns that provides customers with a nearly indestructible knife handle.

BUCK KNIVES NOW OFFERS **IN-HOUSE CERAKOTE™**

With the continually rising popularity in Cerakote™ coatings and the quality benefits it provides, Buck Knives has instated a fully operational Cerakote™ lab within its 132,000 sq foot manufacturing facility.

The lab comes complete with curing ovens, the robotic spraying arm and Buck employees who have been trained through the one-on-one program only offered by NIC Industries for applying the coating. The lab also includes a green system for coating disposal as it is ran through a solvent distillation process before disposal.

What is Cerakote™?

Cerakote™ is a Polymer-Ceramic Composite coating that can be applied to metals, plastics, polymers and wood. The unique formulation used for Cerakote™ ceramic coating enhances a number of physical performance properties including abrasion/wear resistance, corrosion resistance, chemical resistance, impact strength, and hardness. Cerakote™ ceramic coatings utilize state-of-the-art technology to out-perform any competitive coating in both laboratory settings and real world applications. (taken from www.cerakoteguncoatings.com)

In-house Capabilities Provide:

- Perceived value add to our products
- Quality upgrades with wear resistant coating
- Customization options with shorter lead time
- Trained professionals for robotic or hand spaying applications to meet tolerance requirements

We've upgraded many products for 2019 with Cerakote™, marked in this catalog with the Cerakote™ logo.

CERAKOTE

BUCK AUTOS

Powerfully deployed with the push of a button, Buck's collection of automatic knives range from straight-forward, automatic tools for the toughest of situations to modern twists to the classic originals like the **110 Folding Hunter®** and the **112 Ranger**.

Offered in different handle materials, premium steels, and upgraded blade and handle coatings, these American-made automatics feature durable construction and are designed for safe use.

A photograph of a forest stream. In the foreground, a large, weathered log lies across the water, partially submerged. The water flows over rocks and debris, creating small rapids. The background is filled with tall, dense evergreen trees, their branches reaching towards the sky. The overall scene is serene and natural.

HUNTING

IN

THE 110 FAMILY

Through modern conservation efforts, Buck continues to offer upgraded materials to our American classics.

The 110 Folding Hunter® transformed history, putting Buck Knives in the front line of the industry as well as a central tradition among families. New for 2019, genuine ebony will now be standard on the 110 Auto, 110 Folding Hunter®, and the 101 Hunter. Through the purchase of these knives, customers are supporting the ebony replanting efforts Taylor Guitars has put in place to cultivate a more sustainable future. This ethically sourced Crelicam™ ebony supports high-quality jobs for men and women in West Africa and ebony replanting in the Congo Basin rainforest, while providing Buck Knives with a genuine wood handle that is nearly indestructible.

THE NEW 112 FAMILY

Several additions have been added this year to appeal to the next generation of 112 users

The additions include two automatic versions and the 112 Ranger LT, a lightweight version weighing only 2.5 ounces—less than half the weight of the 112 Ranger. The new 112 Auto Elite and 112 Ranger Pro feature supreme S30V steel and G10 handles with brushed nickel bolsters. These counterparts combine elegance and durability with the same functionality and quality of the original.

OPEN SEASON[®]

Made from quality materials, the Open Season Series is a combination of the best tools necessary for a successful hunting season.

Offered in both Pro and Avid product levels, the Open Season Series is available with a premium S35VN steel with durable Micarta[®] handles and Buck's standard 420HC steel with red wood. All knives feature an ergonomically contoured handle with large finger choil for controlled, comfortable grip.

SELECTOR 2.0

Based off of the successful Open Season line, the Selector 2.0 includes three easily interchangeable 420HC steel blades.

Designed for any task, the Selector 2.0 comes with a drop point, guthook, and serrated blade. Additional blades are available to purchase separately including a skinner blade, clip blade, small game blade, and a hoofpick blade. Quickly interchanged and locked into place, all blades are finished with Buck's advanced Edge2x™ technology, and guaranteed by our famous Forever Warranty.

ALL NEW PURSUIT SERIES

A multi-purpose alternative to traditional hunting knives, the Pursuit Series fills the need for a mid-range hunting knife designed from the beginner to the experienced, serious hunter.

Competitively priced, these USA made knives are available in fixed and folding configurations with standard or guthook blades. Added detail was put into the design creating a comfortable, non-slip profile and sturdy, dependable blades.

Designed for excellent performance, the Pursuit Series line is a perfect field option.

KINETIC SPEAR SERIES

Outdoorsmen looking to reconnect with their primitive roots can seek out more adventure with our Kinetic spears.

Currently the series is comprised of a Kinetic Hunting Spear, a two tine Kinetic Gig Spear, and a four tine Kinetic Fishing Spear. Each spear features 420HC steel, sharp points for hunting small game/fish and comes with a heavy-duty polypropylene sheath for safe carry.

For lashing instructions, please visit: www.youtube.com/user/BuckKnivesTV

EVERYDAY CARRY

ALL NEW SLIMS

Modern twists to the classics, these 110 and 112 counterparts possess the same traditional features, but were designed as a solution for everyday carry.

Heavy bolsters and handles were replaced with lightweight options to decrease weight and thickness and a deep carry pocket clip was added to allow for quick and easy access. Offered in 420HC and S30V steel, the blades feature a thumb stud for easy one-hand opening.

ALL NEW SPRINTS

Utilizing ball bearing technology, the new Buck Sprint's are designed for smooth and efficient opening with a reduction in friction for rapid blade deployment.

A sturdy liner lock secures the blades while in use. Available in Pro and Select product levels and a variety of different handle materials, these new knives feature a convenient deep pocket carry clip for easy carry.

ASSISTED OPENERS

Quick, easy and ready when you are. Buck's growing collection of assisted opening knives utilize advanced ASAP Technology® for rapid one hand deployment.

Each assisted opener safely locks open and incorporates a safety lock to prevent accidental deployment. New for 2019, we've beefed up our Momentum models with premium Cerakote® finishes and new colors.

REMOVABLE THUMB
SURFACE

LAUNCH BUTTON

BOX: MODEL # 0896PLS-B, CATALOG # 11184

The sale of automatic knives is federally regulated. See page 87 for details.

THE RAPIDFIRE features a dual action opening system for automatic or non-automatic deployment. The knife can be opened manually like a standard liner lock using the thumb surface. The blade locks open in this position and closes as you would a standard liner lock. The thumb surface on the blade can also be removed to show a thumb hole for easy, non-auto deployment. For automatic opening use your thumb to move the launch button upward toward the spine of the knife. The launch button activates the release mechanism that rapidly opens the blade to the locked open position.

DONATED SALES

*Proceeds benefit the MattWouldGo™ LLC,
which raises funds for the Navy SEAL Foundation.*

MATT LEATHERS was a highly decorated combat veteran with numerous awards. The phrase, Matt Would Go, was coined by the leadership of SEAL Delivery Vehicle Team One in recognition of his courage and unflinching devotion to duty. Matt was lost at sea during a free diving exercise in 2013. During his years with the US Navy SEALs, Matt designed a knife that met the expectations and demands of a SEAL. After his death, Matt's father, Tim Leathers, entered into an agreement with Buck Knives to make the exact knife Matt designed. Buck Knives is proud to support the Leather's family in their wishes to benefit the SEALs as well as provide such a well-designed knife for operatives.

TOPS®/BUCK

For those who find themselves in harms way, they need a rugged and reliable blade.

The no-nonsense TOPS®/Buck knives combine over 100 years of making knives with over 100 years of Special Ops knowledge to create high-performance survival and tactical knives designed for law enforcement, military, outdoor professionals and those in the tactical field. Each knife features slots in the blade for oxygen bottle adjustment and wire bending and comes with a heavy duty MOLLE compatible sheath.

COMPADRE SERIES

Designed and engineered with the outdoor enthusiast in mind.

Each piece in the popular Compadre Series has been redesigned with a natural canvas Micarta® handle and cobalt gray steel blade. Engineered with the outdoor enthusiast in mind, the Compadre Series features shock absorbing 5160 spring steel and full tang construction for added strength and durability to endure strenuous outdoor activities. The Camp Knife, Axe, and Froe all come with a genuine leather sheath for safe storage and easy carry.

A scenic photograph of a river with rapids and a forested background. The water is turbulent, creating white foam and splashes as it flows over rocks. The background is a dense forest of evergreen trees, and the overall tone is somewhat muted, giving it a vintage or artistic feel.

FISHING

B

ABYSS IN KRYPTEK®

Designed for the adventurer in all of us, plunge deep into the unknown with the Abyss fillets.

These flexible and comfortable fillet knives feature Kryptek® camo patterns that mimic the hues from the deep seas to the fresh waters. Provide your customers with a glimpse of coastal waters and offer them the bright blues of the Kryptek® Pontus™ camo, or let them delve into the depths of the deep sea with Kryptek® Neptune™ and its shadowy hues. Regardless of the fish they are after, these fillets will make cleaning the easy part of the adventure.

MEASURE FISH DAY AND NIGHT. For long days on the water that turn to night, the NRG "energy" Bump Board provides easy measuring with its glowing technology. Wally Marshall, pioneer of crappie fishing and Mr. Crappie® products, devised the light-up tool with ease and efficiency in mind. Measuring fish up to 20", the board is perfect for the everyday fisherman. There's no need to worry about wasting energy, as a three minute auto shutoff preserves battery life. Say goodbye to fumbling with flashlights and measuring tape.

LEGACY

LEGACY COLLECTION

For over 110 years, Buck Knives has brought you beautiful models from unique and natural materials.

Hours of hand craftsmanship go into each Legacy Collection knife. From modern, high-end designs to timeless pieces that remind us of our heritage and a time where working with one's hands was a way of life, this collection features exceptional designs. Each Legacy model is crafted in the USA by renown knife artists, or our own talented employees.

Knife laws and regulations can vary significantly from location to location. As such, certain styles, sizes and blades may not be permitted in certain locations and areas. Buck Knives produces many different types of knives for a wide variety of legitimate everyday use. However, due to the complex and ever changing nature of knife laws and regulations, it is not possible for Buck Knives to be aware of specific prohibitions in areas where its knives may be purchased, carried or used. It is the responsibility of the buyer/user to investigate, understand and comply with any and all laws and regulations that may apply to his or her area. The buyer/user is solely responsible for any claims arising from violations of these laws or regulations or any unintended use or misuse of the product.

The sale of automatic knives is federally regulated. Always check permissibility within your state or locality as non-federal personnel may be precluded from ownership or use by state laws. NO EXCEPTIONS WILL BE MADE. Purchase of automatic knives must be preceded by the submission of an Automatic Knife Acknowledgement Form. Shipping of Automatic Knives: Automatic knives shipped by Buck Knives, Inc. will be sent via common courier and CANNOT be shipped by the U.S. Postal Service. All returns of automatic knives must be shipped via common courier as well, and not by the U.S. Postal Service. Our policy requires that all automatic knives require a signed Automatic Knife Acknowledgement Form.
